Preface

This guide contains information about installing the Kofax Search and Matching Server language packs and assumes that you have a thorough understanding of Windows standards, applications, and interfaces, as well as Kofax Capture.

If you downloaded the language packs from the Kofax Electronic Delivery site, you can extract the files from ZIP file. Refer to the instructions on the Site. Or, you may have received the language pack as a package that includes electronic media. In this guide, we refer to both the extracted files and the electronic media as the product files.

Related Documentation

In addition to this *Kofax Transformation Modules Installation Guide*, Kofax Transformation Modules 6.0.0 includes the following documentation.

Help

Help for Kofax Transformation Modules is available from the applications as follows:

- From any of the Kofax Transformation Modules components, press F1, click Help from the toolbar, or select Contents from the Help menu.
- From any application window, press F1 or click Help to display context-sensitive Help information for the window.

Help for Scripting

Information about scripting is available from the Help menu of any Project Builder interface that enables you to write or access scripts.

Note This Help is available in English only.

Training

Kofax offers both classroom and computer-based training that help you make the most of your Kofax solution. Visit the Kofax Web site at www.kofax.com for complete details about the available training options and schedules.

Getting Help for Kofax Products

Kofax regularly updates the Kofax Support site with the latest information about Kofax products.

To access some resources, you must have a valid Support Agreement with an authorized Kofax Reseller/Partner or with Kofax directly.

Go to <http://www.kofax.com/support/> for:

- Access to product knowledge bases

Click **CAPTURE: SUPPORT KNOWLEDGE**

- Access to the Kofax Customer Portal (for eligible customers)

Click **CAPTURE: SUPPORT INTERACTIONS** and log in

To optimize your use of the portal, go to the Kofax Customer Portal login page and click the link to open the *Guide to the Kofax Support Portal*. The guide describes how to access the portal, what to do before contacting the support team, how to open a new case or view an open case, and what information to collect before opening a case.

- Product information and release news
Click **Product** and select a product name and version.
- Downloadable product documentation
Click **Documentation** and select a product name and version.
- Access to support tools
Click **Tools** and select the tool to use.
- Information about the support commitment for Kofax products
Click **Options** and select **Kofax Support Commitment**.

About This Release

This document contains important information that is required to localize your Kofax Search and Matching Server 6.0.0 product for the following languages:

- Brazilian Portuguese
- Czech
- French
- Italian
- Japanese
- Polish
- Russian
- Simplified Chinese
- Spanish
- Swedish

Version Number

The Kofax Search and Matching Server 6.0.0 Language pack has the following build number that appears in the About Kofax window:

6.0.0.0.1284

Important Installation Notes

This section provides information related to installing and uninstalling the language pack for the languages listed in the preceding section.

Prerequisites

To ensure the successful installation of the language pack, you need to do the following:

- Verify that your Windows installation supports the character set that you need for the language pack you plan to install. For example, if you want to localize the Kofax Search and Matching Server 6.0.0 installation for Simplified Chinese, your Windows operating system must also support Chinese characters.
- Verify that Kofax Search and Matching Server 6.0.0 or Administration are installed first before applying this language pack. If necessary, upgrade from an earlier version of Kofax Search and Matching Server.
- Close all Kofax Transformation Modules and Kofax Search and Matching Server applications and services.
- Ensure that you have administrative privileges.

Installation of Modules and Language Packs

If you install additional Kofax Transformation Modules modules after you have installed the language packs, those modules cannot be registered correctly. You have to uninstall the language packs first, then run the Kofax Transformation Modules setup to install additional modules, and reinstall the language packs.

Installation

This section provides information related to installing and uninstalling the Kofax Search and Matching Server language pack for the languages listed in the [introduction](#) section.

Installing the Kofax Search and Matching Server Language Pack

This section provides step-by-step instructions for installing the Kofax Search and Matching Server 6.0.0 language pack.

- 1 Download the Kofax Search and Matching Server language pack from the Kofax Web site.
- 2 On the machine where the Kofax Search and Matching Server is installed, run the **KSMS-6.0.0_XX.exe** to launch the installer for the language resources, where XX represents the language code that you want to install.
- 3 On the machine where the Administration tool, is installed, do one of the following:
 - If Kofax Search and Matching Server Administration is installed on a 64-bit machine, run the 64-bit installer **KSMS-6.0.0_XX.exe** to launch the installer for the language resources, where XX represents the language code that you want to install.
 - If Kofax Search and Matching Server Administration is installed on a 32-bit machine, run the 32-bit installer **KSMSAdmin-6.0.0_XX.exe** to launch the installer for the language resources, where XX represents the language code that you want to install.
- 4 When you are notified that the installation process has been successfully completed, click **OK** to clear the confirmation message.
- 5 [Configure](#) the Administration language.

Configuring Kofax Search and Matching Server Language Settings

After you install the Kofax Search and Matching Server language pack, you must configure the necessary language settings in Kofax Search and Matching Server Administration to localize the user interface.

If you change the language for the user interface the language for logging information is not automatically changed and must be done [manually](#).

- 1 Launch Kofax Search and Matching Server Administration 32-bit or 64-bit.
- 2 From the Tools menu, select **Select Language**.
The Application Language window is displayed.
- 3 From the list, select the required language and click **OK**.
- 4 Restart the application for your changes to take effect.

Configuring Kofax Search and Matching Server Logging Report Language Manually

If you change the language for the Kofax Search and Matching Server Administration user interface, the language for logging information is not automatically changed. To change the language for the logging you need to change the `ServerLanguage` registry key for the Kofax Search and Matching Server service and the Load Balancer service.

- 1 From the command line, type “regedit” to start the Registry Key Editor.
- 2 Navigate to:
`HKEY_LOCAL_MACHINE\SOFTWARE\Kofax\SearchMatchingServer\6.0\Default`
 and change the `ServerLanguage` key to the corresponding language code (for example, “it” or “pt-BR”).
- 3 Navigate to:
`HKEY_LOCAL_MACHINE\SOFTWARE\Kofax\SearchMatchingServer\6.0\LoadBalancer`
 and change the `ServerLanguage` key to the corresponding language code (for example, “it” or “pt-BR”).
- 4 Exit the registry editor and restart the Kofax Search and Matching Server service and the Load Balancer service if applicable so that the changes take effect.
 The application is displayed using the selected application language.

Uninstalling the Kofax Search and Matching Server Language Pack

You can uninstall the language pack using the Add or Remove Programs utility (or, on a Windows Vista, Windows 7, Windows 8, Windows Server 2008, or Windows Server 2012, the Programs and Features utility).

- 1 Close all Kofax Transformation Modules and Kofax Search and Matching Server applications and services.
- 2 Open Add or Remove Programs. For Windows Vista, Windows 7, Windows 8, Windows Server 2008, or Windows Server 2012, open Programs and Features.
- 3 Select the Show updates check box. For Windows Vista, Windows 7 and Windows 2008 Server, select View installed updates.
- 4 Depending on the installed product perform the following steps.
 - a Optionally, select the language pack for Kofax Search and Matching Server 6.0.0, and click **Remove**.
 - b Optionally, select the language pack for Kofax Search and Matching Server Administration 6.0.0, and click **Remove**.
 - c Optionally, select the Kofax Transformation Modules 6.0.0 language pack, and click **Remove**.
 - d Optionally, select each Kofax Transformation Modules 6.0.0 module language pack, and click **Remove**.

Resolved Issues

The following issue was reported for a previous version of the language pack and fixed in this release.

Uninstalling Kofax Search and Matching Server Administration

If you have Kofax Search and Matching Server Administration installed on a 32-bit operating system, uninstalling the Japanese language pack now remove all registry entries. (SPR00124297/42734)

Known Issues

This section contains information about potential problems that you could encounter while using the Kofax Search and Matching Server language pack. These problems are organized by module, and workarounds are provided as applicable.

Partial or Incorrect Kofax Search and Matching Server Translations

For all languages, the “Server” portion of the Convert to “Stand-Alone Server” string is not translated. (283068)

Partial or Incorrect Kofax Search and Matching Server Administration Translations

In the Japanese language pack, the “Activate database” option is missing a label. No tooltip appears when you hover your mouse over the icon. (SPR00090159/43705)

In the French language pack, two strings in Administration are incorrectly translated. (SPR00090150/40866, SPR00090148/39401)
